Clean compressed air distribution

Eisele INOXLINe push-in connectors are designed for hygiene and long-lasting quality

From September 19 to 22, 2017 at PROCESS EXPO in Chicago, IL, Eisele Connectors presents a range of durable solid metal connection components for compressed air, gases and liquids, that are ideal for use in food processing and packaging machines.

Eisele Connector's INOXLINe represents an extensive line of different stainless steel solid metal push-in connectors with an easy to handle release sleeve. These non-corroding and easy to clean connection components are the ideal solution for stringent hygiene requirements and aggressive media. Smooth surfaces and a special design prevent dirt and other residues from accumulating and facilitate exterior cleaning. The material used is stainless steel AISI 304/304L or AISI 316L on request. All parts are crafted from solid material and are ideal for hygiene-sensitive applications in the food processing and packaging industry. Due to the large range of high-quality sealing materials, including FDA-compliant Viton and FFKM, suitably designed push-in connectors of the INOXLINe can be used at temperatures from -58 °F to +392 °F. INOXLINe also includes stainless steel push-in connectors designed without dead spaces or joints where product residues can accumulate. They are also suitable for sterile environments.

EISELE CONNECTORS at PROCESS EXPO, North Hall, Booth 2852

About Eisele Connectors:

Eisele Connectors Inc. is a subsidiary of Eisele Pneumatics GmbH & Co. KG, which emerged from a German company founded in 1939. With more than 75 years of experience in precision machining, Eisele is one of the world's leading suppliers for high quality all-metal connectors and customized connector solutions.

Drawing from the company's proven German manufacturing expertise; Eisele's North American facility keeps an ample stock of products and can optimally supply its customers and respond quickly to fulfill needs. The company is part of a global logistics network that guarantees fast availability of products to the global market and is a member of the American Welding Society (AWS), the Society of Automotive Engineers (SAE), the Society of Manufacturing Engineers (SME) and the Association for Hose Accessories Distribution (NAHAD).
