

## PRESS RELEASE

Date: September 11, 2023

### EnviroStar To Unveil New Spray Drying Technology at Process Expo

[EnviroStar](#), a leader in spray drying solutions, will be among the featured presenters at the upcoming 2023 Process Expo, the world-renowned global food equipment and technology show. The event is set to take place from October 23-25, 2023, at McCormick Place in Chicago, Illinois.

As a premier gathering of food and beverage processors, equipment manufacturers, and industry thought leaders, Process Expo is the definitive platform for the exchange of cutting-edge technologies, insights, and best practices. EnviroStar's presence at this event underscores its commitment to revolutionizing spray drying capabilities and providing innovative solutions for a wide range of applications.

EnviroStar is a market leader specializing in water soluble liquids and powders. With expertise and a comprehensive portfolio of end-to-end solutions, EnviroStar is uniquely positioned to cater to diverse industries, from food to pharmaceuticals and beyond. EnviroStar's holistic approach encompasses [formula development](#), [advanced equipment](#), and [tolling services](#) that empower clients to elevate their product performance, reduce costs, and gain a competitive edge.

Visitors to the Process Expo will have the opportunity to experience EnviroStar's breakthrough innovations firsthand. The company's state-of-the-art pilot scale spray dryer systems, known for their compact design, versatility, and high output capabilities, will be on display. These systems have been meticulously engineered to meet the evolving demands of various industries.

"EnviroStar stands at the forefront of spray drying technology, delivering exceptional solutions to meet the intricate needs of our clients," said Clint Buchner, EnviroStar's founder. "Our team's unique blend of expertise, combined with years of research and development, enables us to provide globally competitive spray drying equipment that consistently produces high-yield powders and groundbreaking spray drying solutions."

EnviroStar's booth at the Process Expo promises an immersive experience where attendees can engage with industry professionals and learn about the company's comprehensive capabilities. The EnviroStar team, composed of seasoned professionals with hands-on experience in engineering, chemistry, management, and continuous improvement, is prepared to discuss specific challenges, offer tailored solutions, and share insights on enhancing product quality and efficiency.

Moreover, **attendees are invited to visit EnviroStar at Booth 4704 and inquire about a free sample run, providing an opportunity to witness the cutting-edge equipment capabilities firsthand.**
